tracted, causing a heavy swell in the harbor. It is said that the oldest inhabitants have no recollection of such a long continuance of winds from that quarter, and that the labor of the fishermen are at a deed stand. The reason of this is obvious. On the south side, the north is attempered by the high ridge of mountains which breaks its force in its course, while on the north side it blows direct from the sea. Montego Bey is particularly expected to its fury.

stamprend by the high ridge of mountains which breaks its force in its course, while on the south side, it blows direct from the sea. Montego Bey is particularly expected to its fury.

KINOSTON MARKETS.

[Frem De Cordova's Mercantile Intelligencer, Dec. 24.]

With large supplies at market, and a general decline of prices, we notice no corresponding improvement in the demand for imported goods. Indeed dealers are quite awars to ince east their stocks at this period of the year, and except in a few instances to make of importance have been effected on the thinkings holdsys have had little or no in the stock of the fortnight. But to the extense in excessive before the thinkings and the former sails to the extense in excessive before the filter and in 10 d. 12d. In the American has changed hands from the 10 d. 12d. In the American has changed hands from on very much reduced in someour necessity in the substant as the shore was in 17 peace heard also part of the shortness that the above was in 17 peace heard and a part of the shortness that the shore was in 17 peace heard and a part of the shortness that the shore was in 17 peace heard and a part of the shortness that a shore was in 17 peace heard and a part of the shortness that a shore was in 17 peace heard and a part of the shortness that a shore was in 17 peace heard and a part of the shortness that a shore was in 17 peace heard and a part of the shortness that a shore was in 17 peace heard and a part of the shortness that a shore was in 17 peace heard and a part of the shortness that the shore was in 17 peace heard and the shortness that the shore was in 17 peace heard and the shortness that the shore was in 17 peace heard and the shortness that the shortness tha

still her cape in the sum of \$5,000, and for which this suit is brigget.

For defence, it was combended by Mr. Charles O'Conor, that the baige was overlaten and was in a teaky and unsaventhly condition, and was unsavinglife, noglogerife, and dereleady navigation and stated by those naving charge of her, by means of which she such as above stated, and not aby ugh the categories energy of the defendant.

The case is still on.

THE CENTRAL PARK.

Supreme Court-Special Term.

Before Judge Roomerelt.

IN THE MATTER OF THE PROPOSED PARK BETWEEN THE THIRD AVENUE AND THE EAST RIVER.

The Counsel of the Corporation, against the corpora-tion's wishes and express order, moves this court to aption's wishes and express order, moves this court to appoint certain commissioners, five in number, named by
him, to estimate the compensation to all the parties interested in the plot of ground between Sixty-sixth and
Seventy-fifth streets, Third avenue and the East river,
containing one hundred and fifty and one quarter acres,
for relis-quishing the same, compulsorily, to the corporation, for the purpose of a public park. Such an application, on its face, is novel and extraordinary, and until
house a publicar approximation to the corporation.

Bor of the first hard and selected the control of t

sellom or neulted as authority on questions of coestitutional law
Dillow, corporation counsel, Whiting and Gerard, for
application, Hilton, Berdeley and O'donor, contra.

Nore—The Central park haw, passed about as hour be
for a the other, merely "authorizes" the erroration to
take the ground required any makes it lawful for the
Court, "on the application of the color ration" to applat commissioner—and the taking is to be in the
same manner (that is, subject to special assessment, at
least to a certain extent, for special benefit, is under
the general law of 1813, as amone of Even totact,
however, covered up under vague phraseology) has a
seculative provision in it for its bensit of the few at
the expense of the many, which also calls for the interposition of the present Legislature to co-rect its gross injustice.

Be'ere Hos Judge Mitchell.

Be'ere Hos Judge Mitchell.

Be'ore Hot Judge Mitchell.

JAN. 7.—The Judge mare a final order for the United States Marchal to discharge from cuetod: A examor Helborr, who is claimed by the Bettels government as fugitive. The Marchal primers to obey the order of the State Count, inascende as that United States Commissioner Nelson made a contrary decident, circuiting that the pri oper chall be given up to the claimants. Init will inevitably eventuate in a legal content between the 'ederal and State authorities.

SUPRIME COURT OF THE UNITED STREES.—JANUARY 6.—No. 25. Willism C. Bevins and al., use of O. P. Earles in Willism B. A. Ramey and al. In error to the Circuit Court United States for East Tennesse. Mr. Justice Catron delivered the opinion of the Court, affirming the opinion of the Circuit Court in this cause, with coats.
No. 20. James C. Broome, administrator of Arthur

ing the opinion of the Circuit Court in this cause, with costs.

No. 20. James C. Broome, administrator of Arthur Macon, us The United States. In error to the Circuit Court United States for the Northern District of Florida.

Mr. Justice Wayne delivered the opinion of the Court, affirming the judgment of the Circuit Court in this cause, with interest.

No. 172. Zechariah White w Isaac W Arthur and al. On notion of Mr. Benjamin this writ of error to the Circuit Court of the United States for the Eastern District of Louisians was docket dand clamined with costs, under the forty-third rule of Court.

No. 35. John Garrow and al., appellants, as Amos Davis and al. The argument of this cause was commenced by Gov. Sawardfor the appellants, and continued by Mr. Shepley for the appellers. Acjourned.

Marshal McFarland, an employe in the angur factory of Messus Snell, in Fishdale, Springfield, Mars, came to bis death on the 4th inst. in the mot sheeking manner Having occasion, from some cause unknown, to go up over the wheel which carries the works, it is supposed he made a misstep, and fell on the wheel when running, and becoming en'angled in the backts, was carried round between them and the bulkhead, only one fourth of an inch apart. He was drawn in by the irresistble power of the wheel until his body so effectually weiged up the space as to stop the wheel. The body was crushed in a most horrible manuer. He was an industrious and highly estimable man. 41 years of age, and leaves a wife and seven children, who relied on him for support.

FINANCIAL AND COMMERCIAL.

MONEY MARKET. Monday, Jan. 9-6P. M.
The stock market opened very heavy this morning. The operations were only to a limited extent, and prices below shore current at the close of the market on Satarday. At the first board to day, Canton Company declined & per cent; Pennsylvania Coal, &; Cumberland, &; Eric Pailroad, &; Harlem, &. New Haven Railroad advanced 1 per cent; Michigan Southern Railroad, &. New York Central Railroad bonds were freely offered, but prizes were maintained, and closed at 1/2 per cent advance. Delaware and Hudson continues depressed. The sales lately have been small, and prices steady. Islinois Central bonds are sold daily at the Board, but the market value con-tinues very uniform. Mining atocks are operated in more at the regular Board than at the Mining Board, and they give a better idea of the actual market value of that class of securities. We notice a sale of Caledonia Coal Mining Company at 1% per cent, which is 2% per cent below sales made for cash a day or two since. The depressed state of the stock market generally, can be attributed more to the season than to any thing else. Outside speculators do not feel disposed to take held sharp at this early day. There are a few who have secured a gold line at low figure, and the sales reported, buyer sixty days, are probably made by those who do not wish to lose the present opportunity. Ecta Railroad is doubtiess depressed by the state of affairs to Erie and Harbor Creek, and the spening of the Great Na-tional Railroad connecting with Michigan Central Road at Detroit, may injuse the entire fou hern line of roads to Chicago. It is stated that the Harlem Railroad Company intend making a mortgage loan. This will, of course take precedence of the preferred and all other stock-The scal stocks continue much neglected and depreciated. The season having closed, we shall have no movement to report for some weeks.

The Farmers' Lean and Trust C. mpany has declared a dividend of four per cent; the Corn Exchange Bank, four per cent en the scrip stock; the Northern Bank of Kentucky, and the Farmers' Bank of Kentucky, five per cent, payable at the Bank of America this day; the Macon and Western Railroad of Georgia, five per cent, payable at the Bark of the Republic in this city, on the lat of February. We annex official statements, exhibiting the coedition of the four leading departments of the various banks in

this city at the close o each of the last two weeks in December and the firs: week in January. These returns, it should be recollected, give the average amount for the week, and not the actual condition on the morning of the day the reports are dated. This prevents any preparation for the purpose of making a favorable should

" New bank—; ut two				1

York city banks, at the close of each week within th last five months, compares as follows:-NAW YORK CITY BANKS.

The condition of the principal departments of the New

The last returns do not show any material variation ex cept in deposits. In discounts there has been an increase during the past week of \$18.345; in deposits, \$1,977,235; circulation, \$154,068, and in specie, \$517,955. In each department the movement is greater than that reported the week previous. The line of discounts is now \$6,251,478

The chiy way to prevent this evil continuing is to restrict the class of securities received at the Banking Department & Corts will so doubt be made during the present sessin of the Assembly, to add to the list of securities receivable for banking purposes; but as the Governor appears to be sound on that point, very little will be accomplished in adding to the banking capital of the State. In other States, North, West and South, the legislatures are be sieged with applications for bank charters under the old system. The increrse of banks increases individual credit. All the institutions, both old and new, are competing for business, and if they cannot get enough good, they will take the best they can get. The great point arrived at by the banks is dividends, and that is all the stockhoi err care about. It requires a great deal of good look to accumulate profits enough to squeeze out even an ordinary rate of divisord. With the extravagance practice in the management of these institutions, the delinquencies, defalcations, or, as some call them, the "conspirates,"

31000 Califo's 7's, 70 84
100 do ... 100 do ... 107 45
100 do ... 100 do . cies, defaleations, or, as some call them, the "conspirance," continually going on inside of these granite and brown stone palaces—the bad debts which are almost of daily occurrence, require large profits to overcome and leave anything for the stockholders. At leas: fire per cent of the capital of banks generally, are consumed in this way, independent of the dividends, which must range from six to eight per cent to satisfy those who hald atook. To earn twelve per cent is a very difficult matter, where there are so many competing for business, and bank stocks for investment lave actually ma erially depreciated in value. They may go along smoo hiy energh for a time, and be fortunate enough to desiare mid-sate dividends; but the time must come when the very evils they have preduced, will react disastronely upon themselves. The in expanding credits. It is for their interest to eccourage speculation, to enlarge their lines of di-count, and tae

lead individuals into operations by the facilities furnish ed, who, otherwise, would have confined themselves to more limited, to more legitimate transactions. If the legislatures of every State in the Union, would, for a time least, stop creating these institutions, and let the naural business of the country accumulate so as to be more on a par with the banking capital already in exist-nce, we should, perhaps, eccape wholly or in part, those

diaseters which now threaten on all sides.

The Exchange Bank of Columbia, S. Q., has declared a dividend of fifty cents per share; the Commercial Sank of Columbia, one and a hall dollars per share; the Columbia Insurance Company, two dollars per share; the Columbia Divides Company, two dollars per share; the Columbia Divides Company, two and harlot's and South Carolina Railroad Company, two and half collars per shars; the Merchanta' Bank, of Cheraw,

outh Carolina, five dollars per share.

The following sales of stocks were ma'e at auction, fter the adjournment of the board, by A H. Nicolay :-

be Mercha: ts' Exchange, to morrow afternoon, at half

ast twelve o'clock.

The Cumberland Bank of Alleghany has declared a Evidend of six persont, with an extra dividend of three per cent, for the last six menths; the Mineral Bank a vidend of five per cent, for the last six months; the Cumberland Savings Bink a dividend of four per cent, with three per cent for weekly depositors, for the last six

Among the norfees of bills in the lower house of the egislature of Ohio is one to prohibit the emission and irouls ion of bank notes under the denomination of five collars, and another probibiting all under t-n dollars. Some measure of this kind is absolutely necessary to rans'orm our currency isto semething approaching a neural condition, by substituting specie for much of the

viliainous trash new circulating as money.
The recalpts of the Onio and Pennsylvania railroad in December, 1852, ware. \$44,880 04
In December, 1852, they were. 33 854 53 Increase.....\$30.825 46

The receipts in 1853 have been \$668,000 being \$65,600 ore than the estimate of the superintendent, and more han double the receipts of the previous year.

The receipts at the office of the Assistant Treasurer of

this port to-day, were \$156,304 20; paid, \$35 563 79; ba-

lance \$2,619,628 93 The Governor of Maryland, in his message to the Legisature of that State, gives a very favorable exhibit of the public finances: -The whole amount in the treasury dur ig the new fiscal year ending the 30th of Syptember last. (exclusive of \$240,619 27, received for and credited to the everal funds) was \$1,170,505 47; of which \$1,000,053 19 were the actual receipts of the year. The expenditures for the same period were \$825 147 67; and the balance in treasury at the close of the fiscal year, was \$315,357 80 subject to charges (inclusive of current interest on the public debt.) amounting to \$342,650 98, and payable on

and after the first day of Ostober.

The whole amount in the treasury during the year es imated to the 30th of November, (exclusive of \$198,0.6 55 received for and credited to the several funds,) was \$1, reserved for and executed to the sear labeled to some tree series to that date, showing a decrease of \$12,435 36, ascompared with the reseipts of the year 1852. The expenditures amounted to \$1,185,569 59, and the dalance is he treasury on the 30th of November was \$194,401 69. Juniog the same period \$65,036 68 were disbursed in all f the sinking fund, and \$112,990,37 to the redemption of this stock. If the two amounts last stated are added to the balance remaining in the treasury on the 3 th of November (\$194 402 60) it will show an actual curplus rave ous for the year of \$362,420 65, at ter raying \$673 371 73 for interest on the public debt, and \$352,170 81 for all

otter purposes.

At the close of the fiscal year 1852, the sinking fund amounted to \$2,728,076 61; and on the 30th of November-1863, to \$2,922,756 87; shoving an increase for the year 2:94,674 86 It is now-January, 1854-a little three millions of dollars.

The gross amount of the new taxable basis is \$261,

248 680, which would appear to exhibit an increase of \$88.402,081 over the assessment of 1852. The actual increase, however, (making allow-noe for that part up n which the tax is payable directly tuto the Pressury,)

smcun's to \$49,667,525.

The tolls collected on the Chesapeake and Oh'o Cana from the 1st of January to the Stat of December, 1853 smcunied to \$92 248 f0; and in 1853 to \$145,930, allow ng \$1: 665 83 as the estimate for December last; which there an increase for the year just closed, of \$52,751 to The entire revenue of the year, adding \$5,000 for rents, is estimated at \$150,000. The current expenditure) for the same period, (exclusive of unpaid interest on coupen bords issued for repairs and for the campletion of the cenal, amounting for the year to \$114,000,) are estimated at \$103,177. Of that amount \$10,400 were pail for in terest on loans. The estimated surplus on the current business of the year was \$46,823; of which about \$35,030 have been, or will be, applied to the payment of arrear-ages due for repairs of the canal and other current de

The receipts and expenditures of the Tressury of the

Balance on hand November 1, 1853...... \$514,357 00

week previous. The line of discounts is now \$0,251,475
higher than the lowest point touched, and \$7,734,005 and lier than the greatest amount reported at any time within
the past five months. This difference will soon be covered.
The backs must extend their lines of discount to eke out
even moderate dividends. The rapidity with which banks
have increased in this city and State is t. mly alarming,
and unless some measures are adopted to arrest it, we
shall, before the lapse of many years, find ourselves in
the midst of an expansion of private credit greater than
ever before experienced in the country. The Governor of
this State, in his recent message to the Legislature, calls
its attention to this important flatter, in the following
language:—

The sumber of banks and banking associations in the
State of New York is three hundred and twenty-four.
There were forty eight new institutions extabilished and
increases of one third within two years. In additional
capital created last year was \$14,848 \$50, seedling the
sum invested in banking to \$76,602,075. This extraordinary increases is far beyond the proportionary and other proportions of gold from California and other

Weekly Report of the New York Cottan Brokers' Association.

Brokers' Association.

New York, Jan. 9, 1834.

Sales during the past week, 5,400 bales, v. 2:—Export, 4,911 bales; howe use, 2,717 do; speculation 772 do.

The Board voted:—The marke: has been irregular the

pastweek, closing on Saturday at the annexed quotaions. Prices adopted this day for the following qualities

Memphis Prices Current of December 24, received to day,

The weather during the past week has been cold and wet, yet the rains were too light to affect the low con-dition of the small streams in this section. The Mississip-pli is getting as low as at any previous time this season, while the upper rivers are very low marigable for only

the smaller class of boats. Cotton is now caraind for only the smaller class of boats. Cotton is now caraind for sart to be we Orienna at \$1 for paid, and to Cinctinnate at \$1 for per bale. The flow weather during the mouth of November was favorable to the crop in many sections of the cotton region, and many anticipate sather unfavorable news, perhaps for weeks to come. A feeling of districts to present prices prevails among buyers, while factors and planters have confidence in prices being maintained, and hold off for full figures; here the purchase are very speringly made, and only to fill orders in band. The actions from New Orleans, the present week, show a pretty active market there, and we quote strict middling at 9%c.
